

We Understand Your Challenges

New regulations protect patient safety, security and privacy

In these times of tight budgets and short staffing, the potential for tragic medical errors is a major concern for today's health care professionals. New regulations have been put in place to protect patient safety, security and privacy.

New technologies enhance patient safety

Technologies, such as barcoding, radio frequency identification (RFID) and robotics can reduce the amount of time nurses spend on supply management and documentation, enabling them to focus their attention on the administration of safe and efficient medication. By using a BPOC system, medication procedural errors are virtually eliminated.

We understand your challenges

SATO makes it easy

If you're implementing Bedside Point of Care verification systems or similar patient safety technologies, SATO HealthCare ID can simplify the process, helping you minimize implementation costs and maximize point of care efficiencies and productivity. We offer you a single source for comprehensive solutions that include thermal barcode printers, application software and consumables/print media.

Our desktop-based systems are designed for fast installation with little or no customization and minimal involvement from the hospital Information Technology department. What's more, our solutions are priced below most departmental budgets and offer a low cost of operation.

SATO HealthCare ID application solutions include:

- Patient tracking
- Laboratories
- RFID asset tracking
- Pharmacy
- Secure parcel tracking
- Supply room inventory

Experience you can trust

As a premier manufacturer of thermal printing technology since 1979, millions of customers worldwide have experienced the benefits of SATO's reliable, dependable and cost-efficient identification solutions.

For more information, visit the SATO HealthCare ID web site at www.satohealthcareid.com or call us at 888-871-8741.

SATO HealthCare ID Solutions

Selecting the right technology partner

SATO HealthCare ID is the health care industry's first single-source provider of barcode printing applications for accurate, efficient and cost-effective patient identification, tracking and security.

Designed to facilitate compliance with recent government and industry initiatives, SATO HealthCare ID solutions have been developed to help protect your patients from potentially harmful events and the unauthorized dissemination of private medical information in compliance to HIPPA Regulations. This allows your staff to focus on more urgent needs.

CG Series - Compact Thermal Wristband & Label Printer

SATO's CG Series of printers are the "best in breed" for your thermal printing of wristbands and labels. Small, yet robust, the CG Series will consistently provide you quality printing whenever you need, wherever you need.

Our solution helps you meet the demanding requirements of the FDA, AHA, HIPAA and JCAHO guidelines for patient identification wristbands and labels.

Compact Design - Using less than 25% of the counter space now dedicated to card embossers.

Quiet Operation - So quiet these printers may be used by any department, on any floor, anywhere, or at anytime.

High Capacity - Prints a roll of 100 wristbands, or thousands of labels before reloading.

EZ Loading - Its high lift print head and drop in consumable design makes loading EASY and FAST!

Cost Effective - It's thermal printing at its best! No need for expensive toner or color ink cartridges, wasted labels or other costly consumables!

SATO HealthCare™ Patient ID - Industry's First Client Based Software

Print barcoded wristbands using your existing embosser (or laser printer) data streams **without changing the host system!**

SATO HealthCare™ Patient ID was designed for use with Microsoft Windows® platforms. It interprets raw, non-formatted PCL and HL7 data streams to generate patient identification wristbands and labels.

Solutions - Set the foundation of your Auto ID platform for Patient Point of CARE

Printing - Print barcoded patient wristbands or labels, when needed, where you need them!

Photo Identification - Add additional security to patient id with the built in patient photo feature!

On Demand - Decentralized print and reprinting for labels and wristbands, on demand! In any quantity you require!

Quality - Sharp, clear thermal imaging of text, barcodes and pictures without the waste and cost of laser printing!

DuraMark™ Wristbands - Safe Patient Identification for Adult, Pediatric & Infant Care

Each wristband provides enhanced safety through positive identification of individual patients, linked to a patients medical or account number using human readable text, barcodes and if desired, a patient's picture. All are direct thermal eliminating thermal transfer ribbons which raise costs, are cumbersome, and under HIPAA guidelines require expensive destruction procedures.

SATO's DuraMark™ Wristbands are:

- Smudge, Smear & Water Proof
- Comfortable & Dependable
- Latex Free Material

SATO's Failsafe Fasteners™

- 7 Colors For Identity, Status Codes
- Non-Transferable Security Closure
- Latex Free Plastic

Wristband Product Information

Designed for printing on a SATO CTMD thermal printers. This all-purpose band provides reliable, sharp-edge print quality to maximize the barcode scan accuracy rate.

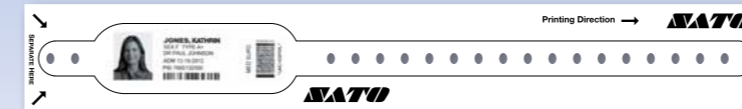

SATO's Failsafe Fasteners™

Adult Wristband (1 1/8" W x 11 1/2" L)

Infant Wristband (3/4" W x 7 3/8" L)

Adult/Pediatric Wristband (1" W x 10 1/4" L)

Neonatal Secure ID™ Bands - Safe Patient Identification of Neonatal Patients & Newborns

Each band provides safety through positive identification of the individual patient and presents a platform for linking mother/infant. High quality materials allow for the print of human readable text, barcodes and if desired, a patient or parents picture. All without the need of thermal transfer ribbons or the mess of laser toner.

Dependable Identification for:

- Birthing Wards
- Neonatal Intensive Care Units (NICU)
- Delivery Room
- Obstetric Wards
- Maternity Wards

Neonatal Secure ID™ Bands are:

- Smudge, Smear and Water resistant
- Comfortable, Dependable and Secure
- Reliable means of Positive Neonate Identification

WRISTBAND PRODUCT INFORMATION

Created for patient comfort and ease of use, this durable material is acrylic based, hypoallergenic, UV coated and direct thermal in technology. It demonstrates excellent resistance to oils, plasticizers, alcohol, and water.
