

TAGGIT® PRO

Tag & Label Design Software

TAGGIT PRO Labeling Design Software and Database

Add a powerful, easy-to-use barcode label design application to your company's business process. TAGGIT PRO is a sophisticated, intuitive barcode and label design software package.

The stability of TAGGIT PRO's updated platforms means the application is capable of handling today's requirements and will support the future growth of your business.

TAGGIT PRO supports more than 40 barcode symbologies allowing you to easily comply with industry standards, over 25 languages and the ability to print in virtually any language. It offers simple installation for thermal printers plus any Windows® printer driver and is backward compatible.

TAGGIT PRO Labeling Design Software and Database includes many features and benefits:

- Fresh, modern interface with intuitive menu options
- Simplifies adding barcodes, images, text (including TrueType Fonts), and variables during label creation
- Quick and easy connection to, and creating queries from, a database
- Reduces errors at the time of print, using customizable forms
- Easy to produce label samples and graphic elements
- Includes customizable plant database; use one of the 4,500 preloaded records (including Annuals, Perennials, Trees and Broadleaf Shrubs) or add your own varietal or information

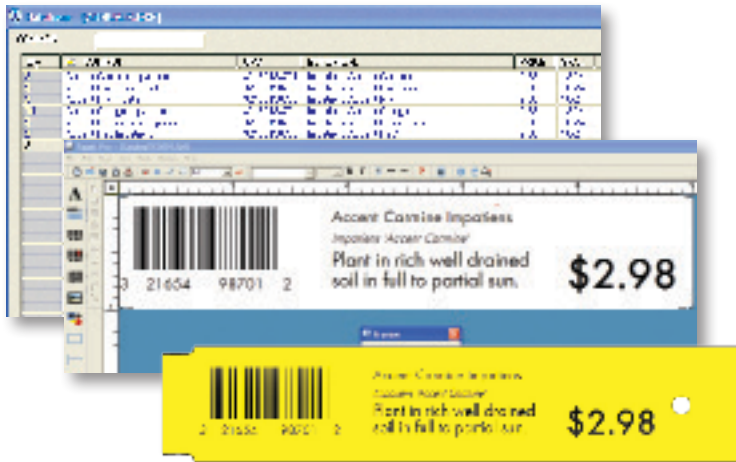

GENERAL SPECIFICATIONS

TAGGIT® PRO Tag & Label Design Software

Go From Template to Tag!

Load templates and plant information to quickly design tags (above) and print tags exactly as designed (below).
